COLORADO STATE UNIVERSITY
UNDERPASS AT PROSPECT AND CENTER

Colorado State University is building an underpass at Prospect Road and Center Avenue to provide safe passage for pedestrians, bicyclists, and longboarders onto main campus from the south.

- Extra wide passageway
- For bikes, pedestrians and longboarders
- $6 million project, bond funded
- Provides a well-lit, landscaped gateway

CONSTRUCTION TIMELINE
Construction began in November, 2015, and will be completed Fall 2016

LOCATION
East side of intersection of Prospect Road and Center Avenue

FAST FACT
An estimated 1,600 students on bicycles and 1,700 student pedestrians enter campus from the south each day during the academic year. This underpass provides them, along with faculty, staff and guests also entering campus from the south, with a safe passageway that eliminates potential conflict with vehicles on Prospect Road.
